BUG TITLE	
When user links phone calendar to app's, phone calendar events don't show in list	

Impact	
Users are unable to see their phone calendar events within the list in the app. This disrupts their ability to manage their schedules	

Network	Device type
WiFi	IOS

Steps & Attachements

1. Open the Any.do app.
2. Click on calendar and approve to be linked to phone's calendar
3. Click on one of the events in calendar
4. Check list that the event is under
5. Go to that list and check that event exists there

   Expected result: Events should exist in someday/upcoming section
   Actual result: Events do not sync correctly in list

BUG TITLE	
When user converts grocery list to normal list, all elements of grocery list is assigned to be done 'someday' automatically	

Impact	
grocery items in grocery lists to be converted to a regular list and assigned randomly to 'someday' may cause issues for users with planning their daily/weekly tasks.	

Network	Device type
4G	IOS

Steps & Attachements

1. Open the Any.do app.
2. Create a grocery list
3. Add items to list
4. Click on menu on top right corner
5. Click on convert to regular list

Expected result: Elements should be assigned to day based on user preference or depending on when it was created
Actual result: Element list gets automatically inserted under someday section

BUG TITLE	
Rectangular icon on top left corner does not indicate what's its functionality	

Impact	
The icon does not clearly indicate what action or outcome is expected when clicked. This ambiguity affects the user experience by making it difficult for users to understand its functionality	

Network	**Device type**
4G	IOS

Steps & Attachements

1. Open the Any.do app.
2. Click on 'next 7 days' button
3. Click on 'icon' in top left corner

   Expected result: Icon should be clear and indicates its purpose
   Actual result: Icon is vague and not sure what's the functionality behind it
